Dear Madam:

As a frequent air plane passenger, I am horrified at the prospect of having cell phones being used during flights.

I do not wish to hear others conversations, while I am trying to rest or read. I think it rude and unethical for people to use these devices in crowded situations.

I have many times have had arguments with people on public conveyances using cell phone but being stuck for hours on a flight with a cell phone user is simply unconscionable. I could see some pretty hefty arguments and even fist fights over this issue.

PLEASE NO CELL PHONES ON AIRLINES.

Sincerely,

*Denise D'Anne*
